Job Description

Company Background:

At Jones Food Store Equipment, we supply, install, and service refrigeration equipment primarily for supermarkets throughout British Columbia. Founded in 1971, our strong relationships with the leaders in the industry are built on a foundation of integrity and innovation. We work with architects, general contractors, and store owners on small to large scale supermarket refrigeration installation and renovation projects.

Our Opportunity:

We currently have an opening for a Journeyman or Apprentice Refrigeration Mechanic to join our company. We are a quality minded company that promotes a positive culture of values and encourages personal and professional growth. Jones is a union company and our refrigeration mechanics are members of UA Local 516, applicants must be willing to join the union. To see the wage table, please use a web search for "UA 516 Collective Agreement". We value tickets from all trades and are open to candidates pursuing dual tickets.

Position Overview:

As a Journeyman, you will oversee commercial refrigeration repairs and/or projects including ordering materials, scheduling equipment deliveries, and providing training for apprentice technicians on various job sites.

Apprentices are supervised and mentored by Certified Refrigeration Technicians. You will have the ability to learn and apply company methods, practices, procedures, and regulatory requirements to install refrigeration systems.

Specific Skills

- Measure, cut, and connect piping without leaks using welding and brazing equipment
- Measure and lay out reference points for installation
- Repair refrigeration equipment
- Operate tools, gauges and other testing equipment
- Handle, recover, and store refrigerants
- Assemble and install refrigeration components
- Commission systems and test for leaks

Qualifications / Competencies

- Skilled trade experience preferred
- Experience repairing, installing and commissioning refrigeration systems in supermarkets is a definite asset
- Demonstrated mechanical aptitude
- Excellent electrical troubleshooting skills
- Able to analyze and interpret construction and schematic drawings, technical literature, and equipment specifications
- Self-motivated and team-oriented; a capable mentor for the team
- Career oriented with an interest in ongoing technical and professional training
- Available for local day or night work with some extended out of town travel required. Travel and living out allowance provided.
- Take pride in delivering quality work and upholding rigorous standards; ability to independently apply our processes and procedures
- Effectively communicate in English, both written and verbal.
Class 5 driver’s license

Valid Refrigeration Journeyman Certificate or enrolled in training
