- Install hot aisle/cold aisle containment systems
- Install/service environmental monitoring systems
- Free cooling chillers repairs and maintenance
- Boiler repairs and maintenance
- Circulating pump repairs and maintenance
- Provide information to management for quotes
- Understanding and willingness to follow proper safety techniques
- Complete electronic paperwork weekly
- Demonstrate professionalism through appearance, written and verbal communication
- Training will be provided

About Tier 5: We are a UA516 contractor based in the lower mainland and the interior. We focus on specialty cooling projects and service. We primarily install and service products and brands such as Vertiv (Liebert), APC by Schneider Electric, Espec & Aermec. The specialty products we work with are in-row and over aisle cooling products for data centers, cascade environmental chambers for manufacturing R&D and economizing chillers. Tier 5 is also an IT infrastructure reseller, dealing in IT racks, UPS, power distribution and software. 90% of our work is indoors.

Tools: Applicant is expected to supply all of their own basic trade hand tools. Tier 5 will supply laptop, cell phone, vacuum pumps, recovery units, calibration tools, refrigerant scales, micron gauges etc.

Why Tier 5 is a great place to work: The team is continuously upgrading skills with factory training programs. We are a motivated team who enjoys the advancing technology in our industry. We treat staff and customers the way we would want to be treated. Tier 5 has committed focus on being a company that everyone wants to work for. Our staff learns to do all aspects of the industry well.

Date: December 15th 2022
