

Hiring Commercial HVAC Technician with Hydronic experience

Now under new management team, BC Comfort service division is looking to add an HVAC Mechanic with hydronic experience to its team. BC Comfort is a well-established HVAC contractor serving the Lower Mainland since 1972. We offer full plumbing and mechanical services for new construction, commercial, institutional, light industrial and multi use buildings.

We are currently looking for an experienced hydronic mechanic to join our team.

Service Plumber willing to HVAC Apprenticeship will be considered.

Required Qualifications:

- Commercial hydronic loop experience
- 3 years experience on boiler work
- Strong interpersonal and problem-solving skills
- Ability to work on different HVAC systems
- Ability to work independently and as part of a team

The key duties and responsibilities are as follows:

- Diagnose, install, repair and service commercial hydronic and HVAC systems
- Inspect and repair customer's hydronic and HVAC systems; troubleshoot
- Maintain up-to-date knowledge of all modern equipment regulations
- Effectively communicate solutions and options to customers
- Prepare detailed quotes for repairs and service agreements

What's in it for you:

- Competitive pay rates for right candidate, negotiable based on experience
- UA516 Enrollment
- Extensive Benefit plan
- Inclusive and engaging work environment
